

Dear Readers,

Here comes the publication that has the power to end the corona crisis quickly and sustainably and to use it as an opportunity for everyone.

It is clear and obvious that Prof. Christian Drosten from the Charité in Berlin not only violated the most fundamental rules of scientific work with his actions in the Corona crisis.

His action, to construct an alleged virus detection test and to offer it to the world public via the World Health Organization (WHO) – before Chinese scientists published indications of the possible presence of a harmless or a dangerous virus – intended to globalize the wave of panic that started on December 30, 2019 in Wuhan, China.

Prof. Drosten is mainly responsible for the fact that people all over the world, by means of the assertion of a demonstrably false fact, were and are still being placed under living conditions that are defined in the International Criminal Code (VStGB) as crimes against humanity.

Section 7 of the International Criminal Code (VStGB) defines in (1) as "Crimes against humanity":

"Anyone who is involved in a widespread or systematic attack against a civilian population"

2. "with the intention of destroying a population in whole or in part, placing it or parts of it under living conditions that are suitable for bringing about its destruction in whole or in part,"

5. "tortures a person who is in his custody or in any other way under his control, by causing him considerable physical or mental harm or suffering that is not merely the result of sanctions permissible under international law,"

8. "Causes serious physical or mental harm to another person, in particular of the kind specified in Section 226 of the Criminal Code".

Prof. Drosten knows that he is doing his test under the condition that a SARS-CoV-2 virus actually exists and that it has been proven that it has pathogenic properties, whereas to this day the virologists involved point out that this evidence has not yet been provided.

His test:

a. cannot detect an intact, infectious virus, but at most fragments that are attributed to the virus;

b. cannot distinguish between endogenous and foreign substances.

His test can only detect very short gene sequences. However, a virus is defined as a long strand of genetic material that can only develop its claimed ability to infect as a whole.

These facts alone prove that Prof. Drosten, with his globally effective claim that he had developed a reliable test for the allegedly new virus, not only violates the laws of thought and logic of virology, but that he acted and still acts with intent.

He did not accept my offer to him to carry out the control experiments that are mandatory in science together with me in order to save face.

These prescribed control experiments have not been carried out or published to date. These experiments must and will be used to prove whether the short gene sequences, which are only mentally put together to form an alleged virus genetic strand, actually come from a virus or – as given here – are only typical components of metabolism.

In order to end the corona crisis quickly, I reported Prof. Christian Drosten. Because of his actions, which in direct consequence to the planned and executed facts of the §7 (1) Völkerstrafgesetzbuch (VStGB) led “crimes against humanity”, and other offenses such as employment fraud. He pretends to work as a scientist in public, but has injured the laws of thought, the logic of virology, and the unequivocal rules of scientific work, and deceived to gain advantage by spreading proven false facts.

I will inform you which of the competent national and international law enforcement authorities are opening the investigation and how they decide.

In order to avoid further damage to the body and soul of people and the economy, I ask you to check the linked text "Misinterpretation of the Virus Part II. Beginning and End of the Corona Crisis" and, if you can understand the reasoning, to spread it. In this case, please send the text to those responsible at home and abroad, e.g. for information and to initiate to various governments via their ambassadors.

In the event that you receive constructive answers, please let me know.
